Grand Total:			\$3,350.00

 Service Description – June 4, 2025 **Property Address:** 113 Dudley Dr Rockledge, FL 32955

On June 2, 2025, Space Coast Emergency Tarping responded to an urgent request for roof mitigation services at the above property due to active interior water intrusion. Upon arrival, our two-man crew confirmed multiple weather affected shingles leading to interior water damages in the garage area. Despite mid to heavy rainfall, we took immediate action to prevent further damage by installing **one poly tarp** – measuring 20' x 25' which was securely anchored using a combination of **sandbags and heavy duty rope** to provide temporary protection against further weather exposure. A total of **500 square feet** of roofing was covered.

The property is located **less than one hour from our dispatch office in Palm Bay, Florida**, and therefore no **trip charge** has been included. The **entire scope of work** – including inspection, setup, tarp deployment, and site cleanup – **was completed the same day** to mitigate the water intrusion and stabilize the structure until permanent roof repair or insurance adjustment can occur.

⚠ Important Notice: This tarp installation is a **temporary emergency measure**. While it is designed to resist moderate weather conditions, it is not a permanent solution. Wind uplift or future severe weather events may compromise the tarp's integrity. **In the event of additional storms or exposure** that requires tarp reset or replacement, **a new service charge will apply. A signed Work Authorization Agreement, Direction of Pay, and before-and-after photos have been submitted along with this invoice for your review.** If any of the aforementioned items are missing or you would like to request copies, please email us at info@spacecoastemergencytarping.com and include the claim number in the subject line. Thank you !
