Service Description – Property Address: 2171 Pelham St NE, Palm Bay, FL 32905

On April 18, 2026, Space Coast Emergency Tarping responded to an urgent request for roof mitigation services at the above property due to active interior water intrusion and storm-related roof damage. Upon arrival, our **two man crew** confirmed multiple missing shingles requiring immediate action. We installed 1 tarp measuring **30' x 30'** which were securely anchored using **sandbags** to provide temporary protection against further weather exposure. A total of **900 square feet** of roofing was covered. The property is located approximately 23 minutes (10.5 miles) from our dispatch office in Palm Bay, FL, which is within our standard service radius, so no **trip charge** has been applied. The **entire scope of work** — including inspection, setup, tarp deployment, and site cleanup — **was completed the same day** to mitigate the water intrusion and stabilize the structure until permanent roof repair or insurance adjustment can occur.

⚠ **Important Notice:** This tarp installation is a temporary emergency measure. While it is designed to resist moderate weather conditions, it is not a

Important Notice: This tarp installation is a **temporary emergency measure**. While it is designed to resist moderate weather conditions, it is not a permanent solution. Wind uplift or future severe weather events may compromise the tarp's integrity. **In the event of additional storms or exposure** that requires tarp reset or replacement, **a new service charge will apply. A signed Work Authorization Agreement, Direction of Pay, and before-and-after photos have been submitted along with this invoice for your review.** If any of the aforementioned items are missing or you would like to request copies, please email us at info@scetarping.com and include the claim number in the subject line. Thank you!
